## Move Beautifully

Let's change mobility by mixing technology and art, and good ideas with good design.

Let's show the world that functionality is fun, and practicality is beautiful.

Let's make the start button a trigger button—every time it pushes, it transforms Monday mornings rides, school runs, traffic jams, and last-minute-we-don't-have-bread calls into something exciting.

Let's keep elevating even the most mundane ride, and making the journey the best part of the day.
