

wallplanks™

A  FromTheForest product

WALLPLANKS	Other products (flooring and/or 4mm sawn face lumber)
¼" thick. Made as wallcovering. Goes right up to existing baseboards, door casings etc. No need to make major alterations to existing outlets and receptacles	Flooring used as wallcovering usually requires removal and refitting of existing baseboards, door casings etc., extending door jambs, electrical outlets and receptacles
Easy to install on any flat wall surface. No special power tools needed.	Flooring usually requires skilled laborers and power tools like table saw, nail gun and compressor etc.
	4mm sawn face lumber
Structurally balanced engineered wood wallplank	Prone to cupping, warping and cracking
Precision shiplap joint that make planks interlock easily and prevents underlying wall from showing through.	No shiplap. Underlying wall needs to be painted in color of wall to be installed.
Low gloss polyurethane top coat for protection and easy cleaning.	Unfinished. Unprotected. Can't be wiped down easily.
Sustainable product: CARB certified and Lacey Act compliant.	No certifications.
Trim available in all offered SKUs.	Matching trim not available for all wall designs.
MSRP US\$9.99 per square foot	Retail pricing between US\$12-25 per sqf
Available in a broad collection with rustic and modern looks. Guaranteed to offer a style for every taste and interior. Trendsetters, not trend-followers.	Only available in rustic looks.
